Simple & easy

T5 Seamless Illuminations

(NODAK)

(T5 Seamless fluorescent Illumination)

Benefits

Features:

1. Seamless Illumination can offer seamless direct and indirect lighting.

2. Space-saving and compact design. They can be installed in a whole line to create uniform brightness without any dark zone. The only fluorescent lamp that lights from end to end and can light uniformly without any dark zone in continuous rows because no ends on both end.

3. Great improvement on the length of the tubes and choices for colors.

4. Made of solid state of hydrargyrum and with the function of environmental protection.

5. Excellent for indirect lighting, direct lighting, sign boards lighting in industrial lighting, architectural lighting ,indoor lighting such as office, supermarkets, hospitals etc.

6. Various lengths for your choices : 280mm,550mm, 850mm, 1150mm. Also different lengths can be combined together to form channel lighting.Four color choices : 2700k, 4000k, 5000k, 6500k.
